YOUR FEET ARE YOUR FOUNDATION™

Feet are often the starting point for pain. Your feet do not have to hurt for them to be causing pain/ imbalances somewhere else in your body.

Pain in the...

NECK

LOW BACK

HIPS

KNEES

...can be from having an unbalanced foundation.

Weaknesses or imbalances in the feet can be what is causing pain.

BUILD A SOLID FOUNDATION

Stabilizing Orthotics were made by a chiropractor to treat the body as a functional unit and give you the support you need. Foot Levelers' Stabilizing Orthotics support the body's foundation to help adjustments hold better.

FALLEN ARCHES NOT SUPPORTED BY ORTHOTICS

BALANCE THE BODY

The structural support for the entire body's equilibrium starts at the feet. Stabilizing Orthotics help maintain the feet's 3-arch structure, called the plantar vault. The plantar vault optimizes the body by:

- Giving strength to support the weight of the entire body
- Permitting flexibility to accommodate changes in terrain
- Providing momentum for movement

Stabilizing Orthotics help to stabilize, balance, and maintain the body's foundation.

JUST FOR YOU

Your postural condition is as unique to you as your fingerprint. That's why Stabilizing Orthotics are individually designed for you, based on your lifestyle the digital scan of your feet.
